

## **MANIFESTO for YOUTH OF SECOND GENERATION**

Taken into account that each country has its own internal laws and policies, we assume that European Union can act towards the creation of an enhanced cohesion and harmony between countries, working to support social inclusion to build a better inclusive society in each European country. In this context, we think that it is important to consider the existence of second and mixed generation in Europe and that, demographically, Europe is changing.

So said, we ask the EU Institutions to support a stronger intercultural education to overcome discrimination and the fear of unknown, enhancing the value of all kind of cultural differences. Moreover, we think that “Employ me” campaigns and initiatives that encourage the mutual recognition and further development of skills and competences of people with migration background are of high importance as well and should be promoted.

In our opinion it will be important to recommend to the EU countries the alphabetization to European Union since the primary school so that it will be possible to develop and express an aware sense of active European citizenship . We also recommend to strengthen more bilateral relations with countries whose cultures are represented in European society.
